Work Experience

Product Designer | Fintech / Investment @ SnappPay

2025 - PRESENT

I am a Product Designer at **SnappPay**, working on core financial products including the **Wallet**. I focus on creating scalable, user-centric experiences for fintech services by translating complex financial concepts into clear, usable, and efficient product flows.
My work spans customer-facing features as well as internal tools, with a strong emphasis on collaboration, data-informed decisions, and system consistency.

Key responsibilities and achievements:

- Designed the **Cashback experience** in the Wallet service, covering user flows, states, and edge cases
- Led the end-to-end design of the **Gift Card feature** in **SnappPay Wallet**, including user flows, core states, and visual designs for gift-card themes.
- **Redesigned** the **Wallet home** screen to improve information hierarchy, feature discoverability, and everyday usability.
- Designed the **Gold purchase pay in 4** journey in Snapp Investment, from product discovery and selection through transaction completion.
- Contributed to the design of the **Asset-Backed Lending** service in Snapp Investment.
- Designed **Wallet Management** capabilities, enabling users to manage wallet settings and controls more effectively.
- Contributed to the end-to-end user flow for **SnappPay Card.**
- Designed the **SnappPay Investment Wallet experience**, helping users manage investment-related balances and activities.
- Redesigned the **wallet withdrawal** flow, making transactions clearer, more efficient, and more trustworthy.
- Designed **back-office dashboards** for multiple SnappPay capabilities, improving internal operational visibility, control, and efficiency.
- Collaborated closely with **Product Managers**, **UX Researchers**, **Data teams**, **Engineers**, and **Stakeholders** throughout discovery, design, validation, and delivery.
- Ensured alignment with **design systems**, **accessibility standards**, and **business requirements** across all projects

Education

Master of Business Administration

Islamic Azad University

2025 - PRESENT

Business Management

Islamic Azad University

2022 - 2025

Product Designer | Fintech / Operator base @ SetareAval (MCI)

2023 - PRESENT

As the Product Designer for the Setareh-Yek loan service, I was responsible for delivering intuitive and **user-focused** designs for the loan acquisition and management platform. My role encompassed multiple aspects of the service, ensuring a seamless experience for users, vendors, and administrators.

To date, the service has successfully distributed over **500 billion** toman in loans, reflecting the scale, impact, and responsibility of the product design work behind it.

Led the design of a comprehensive loan platform including user-facing and admin tools. Key contributions included:

- **User Application Flow:** Designed a smooth, step-by-step loan application process, both online and in-person.
- **Installment Tools:** Created interfaces for payment tracking, calculators, and integration with partner stores.
- Dashboards: Designed dashboards for vendors, in-person registration offices, and internal loan management teams.
- **Web Presence:** Built a responsive website, campaign landing pages, and embedded payment gateway UI for partner stores.
- **Credit Integration:** Included credit scoring services to support loan eligibility checks.

UX/UI Designer @ SetareAval (MCI)

2021 - 2023 (1yrs 11 mos)

Setare Aval is the highest revenue-generating department of Iran's leading mobile telecom company, serving millions of users through products like SetareYek, SetareSim, and Rondtarin.

Key Contributions:

- Collaborated with 5 designers to enhance the SetareYek app and migrate 10+ services from Adobe XD to Figma
- Contributed to the Morph Design System (+7,800 Figma community duplicates)
- Fully redesigned a responsive B2B dashboard used by clients like Asanpardakht, HamrahCard, and Parsian
- Conducted regular usability tests to improve product experience
- Designed SetareSim, a responsive e-commerce platform for SIM trading with advanced features like storefront customization, campaign management, and bulk uploads

Product Design Mentor @ Rahnema College

2025 - NOW

I had the opportunity to mentor a group of talented students in the Product Design Bootcamp at Rahnema College. During this program, I provided guidance on topics like UX research, UI design, design systems, and AR/VR design. I supported students through feedback sessions, helped them tackle real-world product challenges, and reviewed hands-on projects they worked on throughout the course. It was a rewarding experience to contribute to their growth and be part of their learning journey.

Product Design Instructor @ Cando

2025 - NOW

I teach aspiring designers in the Product Design course at Cando, helping them develop both the practical skills and product mindset needed to build user-centered digital experiences. The course covers product design fundamentals, UX research, benchmarking, UI design principles, Figma, and portfolio development. I also lead workshops on resume writing and building a professional social-media presence, supporting students as they turn their learning into strong, industry-ready projects.

Projects

Morph Design System

I had the pleasure of being one of the 7 contributing designers in the creation of Morph, an open-source design system published on the Figma Community.
As part of the team, I was responsible for designing several key components and patterns within the system, focusing on creating scalable, accessible, and visually consistent UI elements that could be reused across a wide range of digital products.
MY ROLE INVOLVED:

- Designing and refining core UI components based on usability and consistency
- Collaborating with the team to define design tokens, spacing systems, and component behaviors
- Ensuring alignment with accessibility standards and responsiveness
- Testing components in real use cases and gathering feedback for iteration

Working on Morph was a highly collaborative and inspiring experience, and I'm proud that it's now freely available for the design community to explore and build upon.

Hamrah e Man (My MCI)

Over the course of a year, I was responsible for leading the complete redesign of the My MCI app—one of the core digital products of MCI (Hamrah Aval), used by millions of users across Iran.
This project involved rethinking the app from the ground up, with the goal of creating a more user-friendly, visually modern, and cross-platform experience optimized for both mobile and desktop.
As the Product Designer, I worked closely with my teammates and maintained continuous collaboration with the development, sales, and marketing teams. We held regular feedback and alignment sessions to make sure the redesign addressed real user needs and business objectives.
Key contributions included:

- Redesigning the full UI and user flow to improve usability and consistency
- Creating a fresh, cohesive icon set tailored to the app's new visual identity
- Ensuring responsive design across mobile and desktop platforms
- Iterating quickly based on feedback from internal stakeholders and real users

This project was a great opportunity to not only improve the product experience but also to strengthen cross-functional collaboration across departments. I'm proud of what we achieved together, and even prouder to see the positive impact it had on user satisfaction and engagement.

Maveddat Packaging Industries

I was responsible for the complete redesign of the website for Mavvedat Packaging Industries, with a focus on improving both user experience and visual identity across platforms.
The project involved a full review and redesign of the site's information architecture, user flows, and UI components, aiming to deliver a more intuitive and modern digital experience for the brand's audience.
Key contributions:

- Redefined the website's structure and user journey to make navigation more seamless
- Created a clean, functional UI design aligned with the company's brand values
- Designed a fully responsive mobile version to ensure an optimal experience across devices
- Collaborated closely with stakeholders to gather feedback and iterate throughout the process

The result was a refreshed, user-friendly website that better communicates Mavvedat's capabilities and helps users engage with the brand more effectively—whether they visit from desktop or mobile.

Zibato Shop

Responsive E-commerce Website Design for Zibato
I was responsible for the UI/UX design of Zibato, an online store specializing in cosmetics and personal care products. The goal was to create a visually engaging and easy-to-navigate platform that provides a smooth shopping experience across all devices.
My key responsibilities included:

- Designing a fully responsive e-commerce interface optimized for both mobile and desktop
- Crafting a clean and modern visual style aligned with beauty industry aesthetics
- Organizing product categories and flows to enhance usability and conversion
- Ensuring consistency in design components, typography, and interactions
- Collaborating with the development team to ensure design accuracy during implementation
